

SINCERE COMMUNICATION

SHANGHAI 上海曾曦净化科技有限公司  
ZENGXI Purification Technology Co., Ltd

# Company Profile

With over 20 years of dedicated focus in the air filtration industry, we are a professional integrated industry and trade enterprise that combines independent R&D, manufacturing and global trade capabilities. We hold multiple authoritative patent certificates in the air filtration field, highlighting our technical innovation and core technical advantages. To maintain stable product quality and standardized operation management, we conduct ISO 9001 quality management system certification and BSCI social compliance certification on an annual basis, fully complying with international industry standards and meeting the strict requirements of global customers.

## Our Core Competitiveness

### ● 1. Customer Pain Point Focus & Efficient Solution Delivery

We take customer demands as the core orientation and have built profound industry insights and rich practical experience through long-term cooperation on OEM & ODM orders for global clients. We specialize in deeply digging out and accurately identifying the actual pain points and customized demands of customers in air filtration applications, and can respond quickly to customer needs, provide targeted solution design and product optimization, and efficiently solve practical problems for customers to create long-term value.

### ● 2. Differentiated Competition with High Efficiency & Quality Assurance

We stand out in the market with a differentiated competitive strategy centered on fast quotation, fast sample making and fast delivery, breaking the industry bottlenecks of slow response and long cycles. Relying on our professional in-house testing laboratory equipped with complete testing equipment, and the strict ISO 9001 quality management system covering the whole production chain, we strictly control every link from raw material procurement to finished product delivery. While ensuring stable and reliable product quality, we can quickly adapt to market changes and customer customized needs, achieving a perfect balance between efficiency and quality.

### ● 3. Automated & Intelligent Production & Digital Management

We keep pace with the global trend of intelligent manufacturing, fully applying high-performance automated production equipment to upgrade the production line, realizing high-precision, large-scale and stable production, and effectively improving production efficiency and product consistency. In parallel with intelligent equipment upgrading, we have fully implemented standardized digital management modes, including ERP system for integrated production and supply chain management and SOP standard operating procedure for full-process refinement management. This digital and intelligent transformation drives efficient internal operation, strengthens overall operational control, and lays a solid foundation for sustainable development.

## Glass Fiber Filter Paper

- Multi-components fiber hybrid technology
- Introduce the inclined wire paper technology
- Reinforced structure adhesives are used to strengthen the fiber
- Filtration efficiency: 85%—99.995% (0.3μm)
- Low drop pressure
- High strength materials

## Superfine Fiber Filter Material

- Use special technology formula
- Introduce the advanced melt-blown manufacturing technology
- Use the durable electrostatic process technology
- Filtration efficiency: 85%—99.99% (0.3μm)
- Endurable filtration efficiency
- Low drop pressure

## EPTFE Filter Material

- The PTFE microporous film is the main filter layer
- The high permeability stiff material is the auxiliary filter layer
- Use low drop pressure composite technology
- Filtration efficiency: 85%—99.99% (0.3μm)
- Low drop pressure
- Excellent washable ability and reusable design

## Superfine Fiber Composite Filter Material

- The superfine fiber is the main filter layer
- The high permeability stiff material is the auxiliary filter layer
- Use low drop pressure composite technology
- Filtration efficiency: 85%—99.99% (0.3μm)
- Low drop pressure
- Additional features of waterproof, oil-proof and antifouling available

## Odor Removal Material

- The absorption activated carbon is the auxiliary media
- The odor removal catalyst is the main material
- The high permeability is the base material
- Use special upload technology
- Effective in odor removal
- Eliminate specific targeted odors

## Non-Woven Paper Material

- Non-woven paper material can replace paper materials
- Non-woven paper material have advantages over paper in terms of tensile properties, tear resistance, burst strength, and air permeability

## High-efficiency composite filter materials

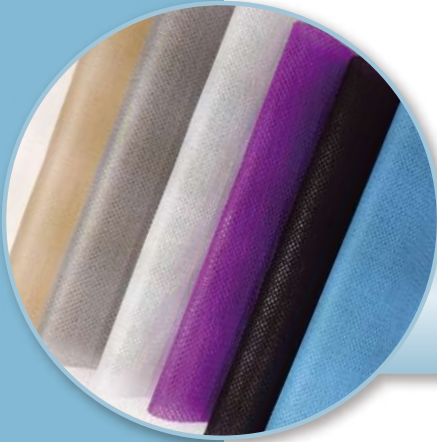

- Air resistance < 40 Pa
- The filtration efficiency reaches 85%-99.99%
- Applied in automotive air conditioners, fresh air ventilators, ventilators, air purifiers, and ventilation filtration systems for special purposes
